

San Joaquin Valley
AIR POLLUTION CONTROL DISTRICT

San Joaquin Valley Air Pollution Control District

2021 Annual Report

Indirect Source Review Program

**Reporting Period:
July 1, 2020 to June 30, 2021**

**SAN JOAQUIN VALLEY AIR POLLUTION CONTROL DISTRICT
GOVERNING BOARD 2021**

CHAIR: CRAIG PEDERSEN
Supervisor, Kings County

VICE CHAIR: LLOYD PAREIRA
Supervisor, Merced County

MEMBERS:

DREW M. BESSINGER
Councilmember, City of Clovis

ALVARO PRECIADO
Mayor, City of Avenal

VITO CHIESA
Supervisor, Stanislaus County

MONTE REYES
Mayor, City of Porterville

DAVID COUCH
Supervisor, Kern County

ROBERT RICKMAN
Supervisor, San Joaquin County

CHRISTINA FUGAZI
Councilmember, City of Stockton

ALEXANDER C. SHERRIFFS, M.D.
Appointed by Governor

DEBORAH LEWIS
Mayor Pro Tem, City of Los Banos

AMY SHUKLIAN
Supervisor, Tulare County

BUDDY MENDES
Supervisor, Fresno County

TOM WHEELER
Supervisor, Madera County

TANIA PACHECO-WERNER, PHD
Appointed by Governor

EXECUTIVE DIRECTOR/AIR POLLUTION CONTROL OFFICER:

SAMIR SHEIKH

I. EXECUTIVE SUMMARY

This “2021 Annual Report on the District's Indirect Source Review Program” was prepared by the San Joaquin Valley Air Pollution Control District (District), and covers the reporting period from July 1, 2020 to June 30, 2021.

District Rule 9510 *Indirect Source Review* (ISR), was adopted by the District's Governing Board to reduce the growth in both nitrogen oxides (NO_x) and particulate matter smaller than ten microns in aerodynamic diameter (PM₁₀) emissions from mobile and area sources associated with construction and operation of new development projects in the Valley, by encouraging clean air designs to be incorporated into the development project, or, if insufficient emissions reductions can be designed into the project, by paying a fee that will be used to fund off-site emissions reduction projects. District Rule 9510 applies to new development projects that would equal or exceed specific size limits called “applicability thresholds.” The applicability thresholds were established at levels intended to capture projects that emit at least two tons of NO_x or two tons of PM₁₀ per year. The rule contains provisions exempting stationary source projects that are subject to the District's stationary source permitting requirements.

Developers of projects subject to Rule 9510 must reduce a portion of the emissions occurring during construction and operational phases through on-site measures, or pay off-site fees. One hundred percent (100%) of all off-site fees are used by the District to fund emission reduction projects through its incentive grant programs, achieving emission reductions on behalf of the project. Additionally, developers pay an administrative fee equal to four percent (4%) of the required off-site fees. This fee is to cover the District's cost of administering the off-site emission reduction projects.

In addition to reducing the development project's impact on air quality through compliance with District Rule 9510, a developer can further reduce the project's impact on air quality by entering into a “Voluntary Emission Reduction Agreement” (VERA) with the District to address the mitigation requirements under the California Environmental Quality Act (CEQA) or National Environmental Policy Act (NEPA). Under a VERA, the developer may fully mitigate project emission impacts by providing funds to the District, which are then used by the District to administer emission reduction projects on behalf of the developer. The District has entered into forty-seven VERAs since 2005.

This annual report includes revenues, expenditures, and emission reductions achieved for both ISR and VERA (ISR-VERA program). To date, in addition to avoiding approximately 17,274 tons of NO_x and PM₁₀ emissions from new development through the incorporation of on-site mitigation and clean-air design measures into projects subject to Rule 9510, the District has achieved approximately 15,892 tons of reductions in NO_x and PM₁₀ emissions through the investment of ISR and VERA funds in its emission reduction incentive programs.

During this reporting period, the District received 360 Air Impact Assessment (AIA) applications. The District also approved two VERAs during this reporting period.

The total amount of funds received for this reporting period was \$5,508,673. This year the District achieved emission reductions via grants and incentives clean-air projects totaling 2,829 tons NO_x and 916 tons PM₁₀, for a combined total of 3,745 tons at a cost effectiveness of \$9,252 per ton of emissions reduced.

II. INTRODUCTION

The San Joaquin Valley is expected to be one of the fastest growing regions in the state through at least 2030. The Demographic Research Unit of the Department of Finance released interim revised population growth projections in July 2021 and expects approximately 14.2% growth in the Valley's population during the 2015 to 2030 period. In contrast, the total population for the State of California is projected to increase by only 7.3% over the same period of time.

Population growth results in increased area source emissions from activities such as consumer product use, fuel combustion for heating and cooking, and landscape maintenance. The total number of vehicle miles traveled (VMT) also increases with population growth, resulting in more emissions due to the combustion of vehicle fuels. The projected growth in these so called "indirect source" emissions erodes some of the progress generated by emission reductions achieved through the District's stationary source air quality management program and state and federal mobile source controls.

Although the District cannot directly regulate mobile source tailpipe emissions, it does have longstanding statutory authority to regulate indirect sources of air pollution. Pursuant to this authority, the District made a federally enforceable commitment to regulate indirect sources when it adopted its PM₁₀ Attainment Plan in June 2003. Subsequently, the California State Legislature passed Senate Bill 709, Florez, in the fall of 2003, which Governor Gray Davis subsequently signed and codified into the Health and Safety Code in §40604. This additional legislation required the District to adopt, by regulation, a schedule of fees to be assessed on area wide or indirect sources of emissions that are regulated by the District.

District Rule 9510 was originally adopted by the District's Governing Board on December 15, 2005, and became effective on March 1, 2006. The current version of the rule was adopted in December of 2017, and became effective on March 21, 2018. The purpose of the rule is to reduce the impacts of growth in emissions resulting from new land development in the San Joaquin Valley. The applicability thresholds were established at levels intended to capture projects that emit at least two tons of NO_x or PM₁₀ per year. Under Rule 9510, project developers are required to analyze and mitigate construction and operational emissions for a variety of residential, commercial, retail, industrial, municipal, and other development projects, which include any of the following:

- 50 residential units
- 2,000 ft² of commercial space
- 25,000 ft² of light industrial space (warehouses, distribution centers, etc.)
- 100,000 ft² of heavy industrial space
- 20,000 ft² of medical office space

- 39,000 ft² of general office space
- 9,000 ft² of educational space
- 10,000 ft² of government space
- 20,000 ft² of recreational space
- 9,000 ft² of space not identified above

Developers of projects subject to Rule 9510 must reduce emissions occurring during construction and operational phases through on-site emission reduction measures or by paying off-site emission reduction fees. One hundred percent of off-site emission reduction fees are used by the District to fund emission reduction projects through its incentive grant programs, achieving emission reductions on behalf of the project. Additionally, developers pay an administrative fee equal to four percent (4%) of the required off-site fees. This fee is to cover the District's cost of administering the off-site emission reduction projects.

This report was prepared pursuant to provisions of Rule 9510 that require the District to prepare an annual report regarding expenditure of received funds and achieved emission reductions. Pursuant to Rule 9510, Section 10.4, the annual report includes the following:

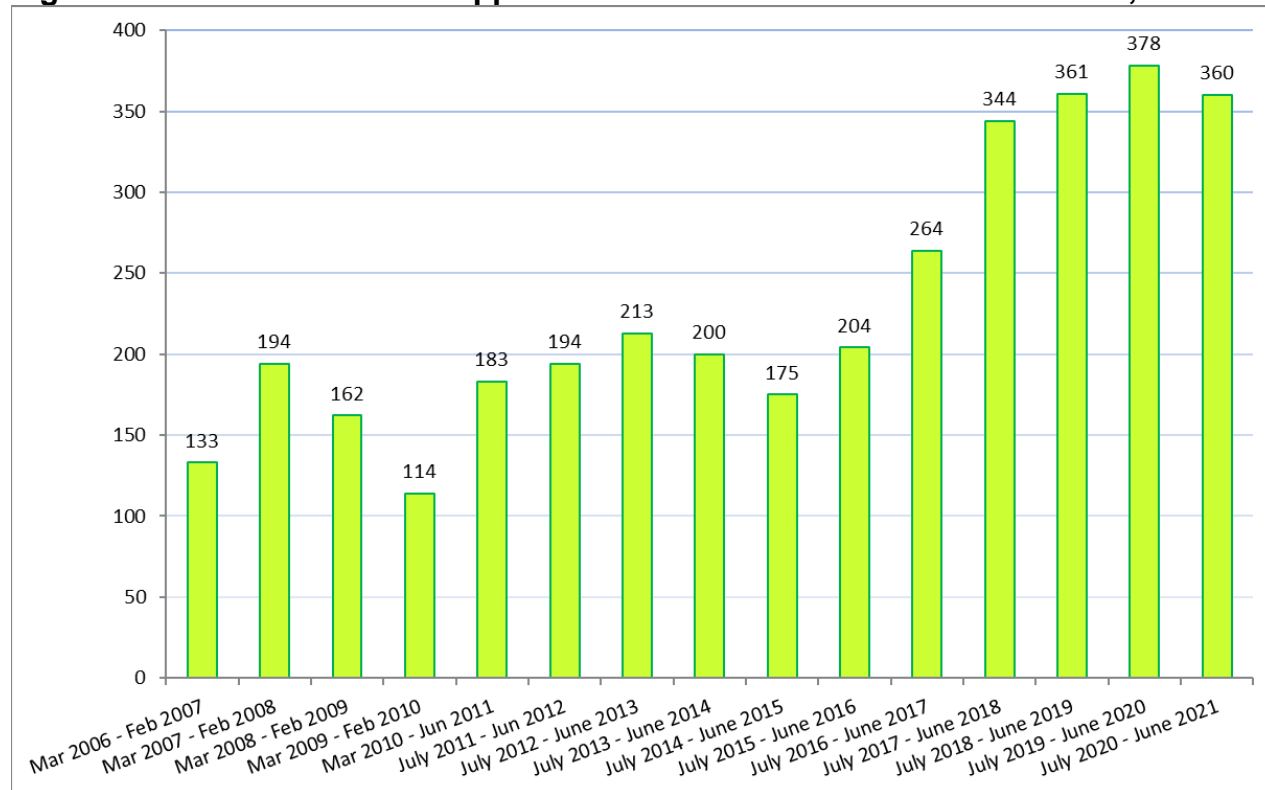

- Total amount of off-site fees received;
- Total monies spent;
- Total monies remaining;
- Any refunds distributed;
- A list of all projects funded;
- Total emissions reductions realized; and
- The overall cost-effectiveness factor for the projects funded.

III. IMPLEMENTATION

District Rule 9510 (Indirect Source Review)

The number of AIA applications received during this reporting period represents the number of new and revised projects subject to Rule 9510 proposed by developers in the San Joaquin Valley. The number of AIA applications received each year since 2006, the first year of Rule 9510 implementation, is presented in Figure 1. During this reporting period, the District received 360 AIA applications compared to 378 AIA applications received during the previous reporting period (see Figure 1 below). The number of AIA applications received encompasses 215 new development projects and 145 modifications to previously approved development projects.

Figure 1: Number of ISR AIA Applications Received From 2006 to June 30, 2021

Through implementation of the ISR rule, District staff is seeing positive changes in development practices. Since adoption of the rule, developers have voluntarily begun to incorporate many air-friendly design changes into their projects. For instance, significant reductions in emissions have occurred through the use of a “construction clean fleet,” which is defined as a construction fleet mix cleaner than the state fleet average. In 2006, only 14.3% of approved projects reduced construction exhaust impacts through use of a clean construction equipment fleets. On average, that percentage is approximately 38% and was 41% for the reporting period covered by this report.

Voluntary Emission Reduction Agreements

A Voluntary Emission Reduction Agreement is an air quality mitigation measure by which a developer can voluntarily enter into a contractual agreement with the District to mitigate a development project’s impact on air quality, going beyond reductions achieved by compliance with District Rule 9510. Under the agreement, the developer provides funds to the District to administer the implementation of the VERA. The District then identifies emissions reductions projects, funds those projects, and verifies that the specified emission reductions have been successfully achieved.

The types of emission reduction projects that have been funded in the past include electrification of stationary internal combustion engines (such as agricultural irrigation pumps), replacing old heavy-duty trucks with new, cleaner, more efficient heavy-duty trucks, and replacement of old farm tractors with cleaner tractors. Since 2005, the District has entered into forty-seven VERAs. It is the District’s experience that implementation of a VERA is often a feasible mitigation measure under CEQA,

effectively achieving emission reductions necessary to reduce impacts to a less than significant level.

For development projects subject to Rule 9510, the developer must also comply with applicable rule provisions. Emission reductions achieved through implementation of a VERA are credited towards satisfying ISR requirements. This report therefore includes revenues and emission reductions achieved through both the ISR and the VERA process.

During this reporting period, the District adopted the following two VERAs:

- Eco Energy & Nu Star
- Friant-Kern Canal Capacity Correction

In 2015, Kern County adopted amendments to Title 19 of the Kern County Zoning Ordinance to address oil and gas exploration and operation activities in the identified area within Kern County. The OGERA was a mitigation measure implemented per the EIR for the Ordinance to mitigate emissions associated with future oil and gas exploration and production in the San Joaquin Valley, as negotiated during the development of the Kern County Environmental Impact Report. Under this program, Kern County collects a mitigation fee from oil and gas companies when issuing permits for the drilling of new oil or gas production wells, and passes the funds to the District to use in its emission reduction incentive grant programs.

Kern County was sued on its 2015 EIR for the amendments to Title 19 of the Ordinance. As a result of a 2020 Appellate Court decision on this litigation, Kern County suspended implementation of the OGERA effective of March 25, 2020. Subsequently, Kern County certified a Supplemental Recirculated Environmental Impact Report (SREIR) on March 8, 2021, addressed the issues pointed out by the Appellate Court.

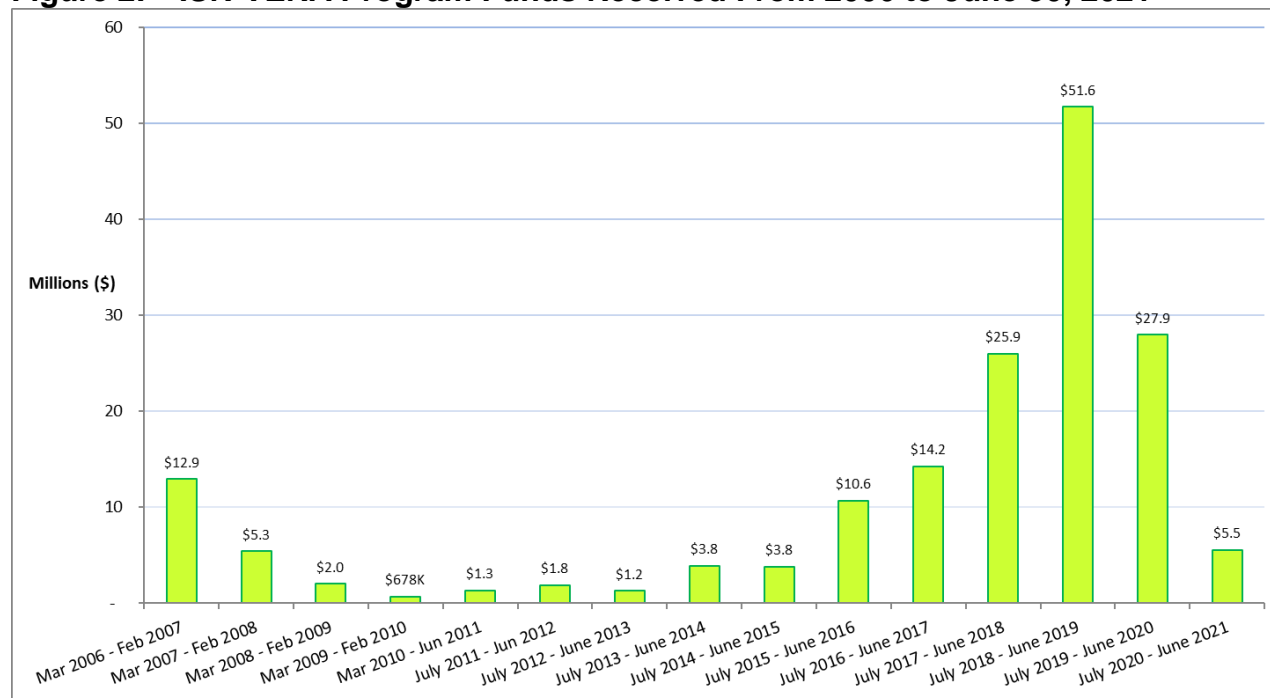

Kern County prepared a draft Supplemental Recirculated Environmental Impact Report (SREIR) for the revisions to the Ordinance. The revisions addressed the issues pointed out by the Appellate Court. The SREIR was released for a 45-day public review period and closed on September 16, 2020. Kern County certified the Supplemental Recirculated Environmental Impact Report (SREIR) on March 8, 2021. Subsequently, a court order stayed implementation of the revised Ordinance until the Court determines the issues identified by the Appellate Court have been satisfactorily addressed.

IV. FISCAL SUMMARY

ISR-VERA Program Funds

As presented in Figure 2 below, the total amount of off-site fees and mitigation funds (Program Funds) received under the ISR-VERA program during this reporting period was \$5,508,673. This decrease from the previous year was due to Kern County halting the implementation of the OGERA, as discussed above.

Figure 2: ISR-VERA Program Funds Received From 2006 to June 30, 2021

The District received \$4,556,522 in ISR funds and \$952,151 in VERA funds for a combined total of \$5,508,673.

As presented in Table 1 below, the District's ISR-VERA account held a beginning balance of \$74,023,904. The District received \$5,508,673, funded off-site emission reduction projects totaling \$34,649,481 during this reporting period, has encumbered \$26,269,816 in contracts for emission reduction projects in the process of being implemented, and refunded \$8,609,452 for canceled projects that had not begun construction, leaving an unencumbered balance of \$10,005,271. Since the end of the reporting period for this report, the vast majority of the unencumbered balance has now been encumbered or is in the process of being encumbered for emission reduction projects during this fiscal year.

Table 1: ISR-VERA Fiscal Summary (July 1, 2020 - June 30, 2021)

ISR-VERA Fiscal Summary	ISR	VERA	Total
Beginning Fund Balance	\$8,574,840	\$65,449,064	\$74,023,904
Amount Received	\$4,556,522	\$950,596	\$5,507,118
Amount Refunded	\$0	-\$8,609,452	-\$8,609,452
Amount Spent (Paid Out)	-\$7,669,379	-\$26,977,104	-\$34,646,483
Ending Fund Balance	\$5,461,983	\$30,813,105	\$36,275,087
Encumbered Amount	-\$4,503,316	-\$21,766,500	-\$26,269,816
Ending Unencumbered Amount	\$958,667	\$9,046,604	\$10,005,271

V. EMISSION REDUCTION SUMMARY

Achieved Off-Site Emission Reductions

During this reporting period, the District spent ISR and VERA monies to fund 3,678 emission reduction projects affecting 3,678 units. The monies were used to fund new electric vehicles, the replacement of wood stove devices, the replacement of old heavy-duty off-road vehicles, including agricultural tractors, and the replacement of on-road vehicles with newer, cleaner versions.

Emission reduction projects go through a thorough application review before the contract for these projects between the District and the project applicant is executed. Once executed, funds are then encumbered for that project. The contract is valid for a limited time to allow for the purchase of the new equipment and to submit a reimbursement request. Once the reimbursement request is approved, the funds encumbered for the emission reduction project are spent (reimbursed to the project applicant). This process typically takes several months for completion. Therefore, depending on the types of emission reduction projects available for funding, the funds received during this reporting period may result in the funds being spent in the same reporting period or in future reporting periods.

Emission reduction projects achieved total reductions of 2,829 tons NO_x and 916 tons PM₁₀, for a combined total of 3,745 tons at a cost-effectiveness of \$9,252 per ton (Table 2 below). A complete list of all projects funded is presented in Appendix A.

Achieved emission reductions presented in the table below represent only emission reductions from projects that have been completed and paid during this reporting period, and the cost effectiveness is based on those projects.

Table 2: Achieved Off-Site Emission Reductions from ISR-VERA (July 1, 2020 - June 30, 2021)

Achieved Emission Reductions				Amount Spent (\$)	Cost Effectiveness (\$/ton)
Source	NOx	PM ₁₀	Total		
ISR	4 tons	657 tons	661 tons	\$7,672,378	\$11,607/ton
VERA	2,825 tons	259 tons	3,083 tons	\$26,977,103	\$8,750/ton
Grand Total	2,829 tons	916 tons	3,745 tons	\$34,649,481	\$9,252/ton

Estimated Emission Reductions

Estimated emission reductions are a combination of emission reductions to be achieved in the future through implementation of project design elements at full project build out and through funding off-site emission reductions projects using off-site emission reduction fees and mitigation fees. For this reporting period, implementation of ISR resulted in estimated combined on-site and off-site emission reductions totaling 2,861 tons of NOx and 2,865 tons of PM₁₀ (Table 3 below).

Table 3: Estimated Emission Reductions from Approved ISR Projects (July 1, 2020 - June 30, 2021)

Estimated Emission Reductions (tons)			
Source	NOx	PM ₁₀	Total
On-site Emission Reductions	1,127 tons	1,889 tons	3,016 tons
Off-site Emission Reductions	1,734 tons	976 tons	2,710 tons
Total	2,861 tons	2,865 tons	5,726 tons

APPENDIX A - EMISSION REDUCTION PROJECTS

List of all emission reduction projects funded by the ISR-VERA Program

ISR Annual Report / July 2020 - June 2021

Project	Project Type	Number of Units	NOx (tons/project life)	PM (tons/project life)
