

San Joaquin Valley
AIR POLLUTION CONTROL DISTRICT

San Joaquin Valley Air Pollution Control District

2020 Annual Report

Indirect Source Review Program

**Reporting Period:
July 1, 2019 to June 30, 2020**

**SAN JOAQUIN VALLEY AIR POLLUTION CONTROL DISTRICT
GOVERNING BOARD 2020**

CHAIR: CRAIG PEDERSEN
Supervisor, Kings County

VICE CHAIR: LLOYD PAREIRA
Supervisor, Merced County

MEMBERS:

DREW M. BESSINGER
Mayor, City of Clovis

TANIA PACHECO-WERNER, PHD.
Appointed by Governor

DAVID COUCH
Supervisor, Kern County

ALVARO PRECIADO
Mayor Pro Tem, City of Avenal

KUYLER CROCKER
Supervisor, Tulare County

MONTE REYES
Councilmember, City of Porterville

BOB ELLIOTT
Supervisor, San Joaquin County

ALEXANDER C. SHERRIFFS, M.D.
Appointed by Governor

CHRISTINA FUGAZI
Councilmember, City of Stockton

CHRIS VIERRA
Mayor, City of Ceres

BUDDY MENDES
Supervisor, Fresno County

TOM WHEELER
Supervisor, Madera County

KRISTIN OLSEN
Supervisor, Stanislaus County

EXECUTIVE DIRECTOR/AIR POLLUTION CONTROL OFFICER:

SAMIR SHEIKH

I. EXECUTIVE SUMMARY

This “2020 Annual Report on the District’s Indirect Source Review Program” was prepared by the San Joaquin Valley Unified Air Pollution Control District (District), and covers the reporting period from July 1, 2019 to June 30, 2020.

District Rule 9510 *Indirect Source Review* (ISR), was adopted by the District’s Governing Board to reduce the growth in both nitrogen oxides (NO_x) and particulate matter smaller than ten microns in aerodynamic diameter (PM₁₀) emissions from mobile and area sources associated with construction and operation of new development projects in the Valley, by encouraging clean air designs to be incorporated into the development project, or, if insufficient emissions reductions can be designed into the project, by paying a fee that will be used to fund off-site emissions reduction projects. District Rule 9510 applies to new development projects that would equal or exceed specific size limits called “applicability thresholds.” The applicability thresholds were established at levels intended to capture projects that emit at least two tons of NO_x or two tons of PM₁₀ per year. The rule contains provisions exempting stationary source projects that are subject to the District’s stationary source permitting requirements.

Developers of projects subject to Rule 9510 must reduce a portion of the emissions occurring during construction and operational phases through on-site measures, or pay off-site fees. One hundred percent (100%) of all off-site fees are used by the District to fund emission reduction projects through its incentive grant programs, achieving emission reductions on behalf of the project. Additionally, developers pay an administrative fee equal to four percent (4%) of the required off-site fees. This fee is to cover the District’s cost of administering the off-site emission reduction projects.

In addition to reducing the development project’s impact on air quality through compliance with District Rule 9510, a developer can further reduce the project’s impact on air quality by entering into a “Voluntary Emission Reduction Agreement” (VERA) with the District to address the mitigation requirements under the California Environmental Quality Act (CEQA) or National Environmental Policy Act (NEPA). Under a VERA, the developer may fully mitigate project emission impacts by providing funds to the District, which are then used by the District to administer emission reduction projects on behalf of the developer. The District has entered into forty-five VERAs since 2005.

This annual report includes revenues, expenditures, and emission reductions achieved for both ISR and VERA (ISR-VERA program). To date, in addition to avoiding approximately 15,617 tons of NO_x and PM₁₀ emissions from new development through the incorporation of on-site mitigation and clean-air design measures into projects subject to Rule 9510, the District has achieved approximately 12,147 tons of reductions in NO_x and PM₁₀ emissions through the investment of ISR and VERA funds in its emission reduction incentive programs.

During this reporting period, the District received 378 Air Impact Assessment (AIA) applications. This represents a 5% increase in the number of AIA applications received when compared to the 360 AIA applications received during the previous reporting period. The District also approved four VERAs during this reporting period.

The total amount of funds received for this reporting period was \$27,957,468. This is a decrease compared to the \$51,697,087 received in the previous reporting period. A large portion of the funds, \$19,019,208, was received under the Kern County Oil and Gas Emission Reduction Agreement (OGERA).

This year the District achieved emission reductions totaling 1,229 tons NO_x and 632 tons PM₁₀, for a combined total of 1,861 tons at a cost effectiveness of \$10,927 per ton of emissions reduced.

II. INTRODUCTION

The San Joaquin Valley is expected to be one of the fastest growing regions in the state through at least 2030. The Demographic Research Unit of the Department of Finance released interim revised population growth projections in January 2020 and expects approximately 15.6% growth in the Valley's population during the 2015 to 2030 period. In contrast, the total population for the State of California is projected to increase by only 8.2% over the same period of time.

Population growth results in increased area source emissions from activities such as consumer product use, fuel combustion for heating and cooking, and landscape maintenance. The total number of vehicle miles traveled (VMT) also increases with population growth, resulting in more emissions due to the combustion of vehicle fuels. The projected growth in these so called "indirect source" emissions erodes some of the progress generated by emission reductions achieved through the District's stationary source air quality management program and state and federal mobile source controls.

Although the District cannot directly regulate mobile source tailpipe emissions, it does have longstanding statutory authority to regulate indirect sources of air pollution. Pursuant to this authority, the District made a federally enforceable commitment to regulate indirect sources when it adopted its PM₁₀ Attainment Plan in June 2003. Subsequently, the California State Legislature passed Senate Bill 709, Florez, in the fall of 2003, which Governor Gray Davis subsequently signed and codified into the Health and Safety Code in §40604. This additional legislation required the District to adopt, by regulation, a schedule of fees to be assessed on area wide or indirect sources of emissions that are regulated by the District.

District Rule 9510 was originally adopted by the District's Governing Board on December 15, 2005, and became effective on March 1, 2006. The current version of the rule was adopted in December of 2017, and became effective on March 21, 2018. The purpose of the rule is to reduce the impacts of growth in emissions resulting from new land

development in the San Joaquin Valley. The rule applies to new residential and non-residential development projects, including transportation and transit projects, which equal or exceed established applicability thresholds. The applicability thresholds were established at levels intended to capture projects that emit at least two tons of NO_x or PM₁₀ per year.

Developers of projects subject to Rule 9510 must reduce emissions occurring during construction and operational phases through on-site emission reduction measures or by paying off-site emission reduction fees. One hundred percent of off-site emission reduction fees are used by the District to fund emission reduction projects through its incentive grant programs, achieving emission reductions on behalf of the project. Additionally, developers pay an administrative fee equal to four percent (4%) of the required off-site fees. This fee is to cover the District's cost of administering the off-site emission reduction projects.

This report was prepared pursuant to provisions of Rule 9510 that require the District to prepare an annual report regarding expenditure of received funds and achieved emission reductions. Pursuant to Rule 9510, Section 10.4, the annual report includes the following:

- Total amount of off-site fees received;
- Total monies spent;
- Total monies remaining;
- Any refunds distributed;
- A list of all projects funded;
- Total emissions reductions realized; and
- The overall cost-effectiveness factor for the projects funded.

III. IMPLEMENTATION

District Rule 9510 (Indirect Source Review)

The number of AIA applications received during this reporting period represents the number of new and revised projects subject to Rule 9510 proposed by developers in the San Joaquin Valley. The number of AIA applications received each year since 2006, the first year of Rule 9510 implementation, is presented in Figure 1. During this reporting period, the District received 378 AIA applications compared to 360 AIA applications received during the previous reporting period. This represents a 5% increase in the number of ISR applications received, which follows a 5% increase in the previous year. The 378 AIA applications received represents the highest number since the rule was adopted, and provides evidence of a continuing trend of a growing housing market since 2010 (see Figure 1 below). The number of AIA applications received encompasses 241 new development projects and 137 modifications to previously approved development projects.

Figure 1: Number of ISR AIA Applications Received From 2006 to June 30, 2020

Through implementation of the ISR rule, District staff is seeing positive changes in development practices. Since adoption of the rule, developers have voluntarily begun to incorporate many air-friendly design changes into their projects. For instance, significant reductions in emissions have occurred through the use of a “construction clean fleet,” which is defined as a construction fleet mix cleaner than the state fleet average. In 2006, only 14.3% of approved projects reduced construction exhaust impacts through use of a clean construction equipment fleets. On average, that percentage has risen to approximately 37%, and was 42% for the reporting period covered by this report.

Voluntary Emission Reduction Agreements

A Voluntary Emission Reduction Agreement is an air quality mitigation measure by which a developer can voluntarily enter into a contractual agreement with the District to mitigate a development project’s impact on air quality, going beyond reductions achieved by compliance with District Rule 9510. Under the agreement, the developer provides funds to the District to administer the implementation of the VERA. The District then identifies emissions reductions projects, funds those projects, and verifies that the specified emission reductions have been successfully achieved.

The types of emission reduction projects that have been funded in the past include electrification of stationary internal combustion engines (such as agricultural irrigation pumps), replacing old heavy-duty trucks with new, cleaner, more efficient heavy-duty trucks, and replacement of old farm tractors with cleaner tractors. Since 2005, the District

has entered into forty-five VERAs. It is the District's experience that implementation of a VERA is often a feasible mitigation measure under CEQA, effectively achieving emission reductions necessary to reduce impacts to a less than significant level.

For development projects subject to Rule 9510, the developer must also comply with applicable rule provisions. Emission reductions achieved through implementation of a VERA are credited towards satisfying ISR requirements. This report therefore includes revenues and emission reductions achieved through both the ISR and the VERA process.

During this reporting period, the District adopted the following four VERAs:

- Little Bear Solar project
- Contanda Renewable Diesel Bulk Liquid Terminal development project
- Project Cougar
- Aquamarine Solar project and Gen-Tie Line project

In 2015, Kern County adopted amendments to Title 19 of the Kern County Zoning Ordinance (Ordinance) to address oil and gas exploration and operation activities in the identified area within Kern County. The OGERA was a mitigation measure implemented per the EIR for the Ordinance to mitigate emissions associated with future oil and gas exploration and production in the San Joaquin Valley, as negotiated during the development of the Kern County Environmental Impact Report. Under this program, Kern County collects a mitigation fee from oil and gas companies when issuing permits for the drilling of new oil or gas production wells, and passes the funds to the District to use in its emission reduction incentive grant programs.

Kern County was sued on its 2015 EIR for the amendments to Title 19 of the Ordinance. As a result of a 2020 Appellate Court decision on this litigation, the OGERA is no longer being implemented by Kern County as of March 25, 2020. Therefore, during this review period the mitigation funds the District received under the Kern County OGERA have significantly decreased from \$41,024,125 to \$19,019,208.

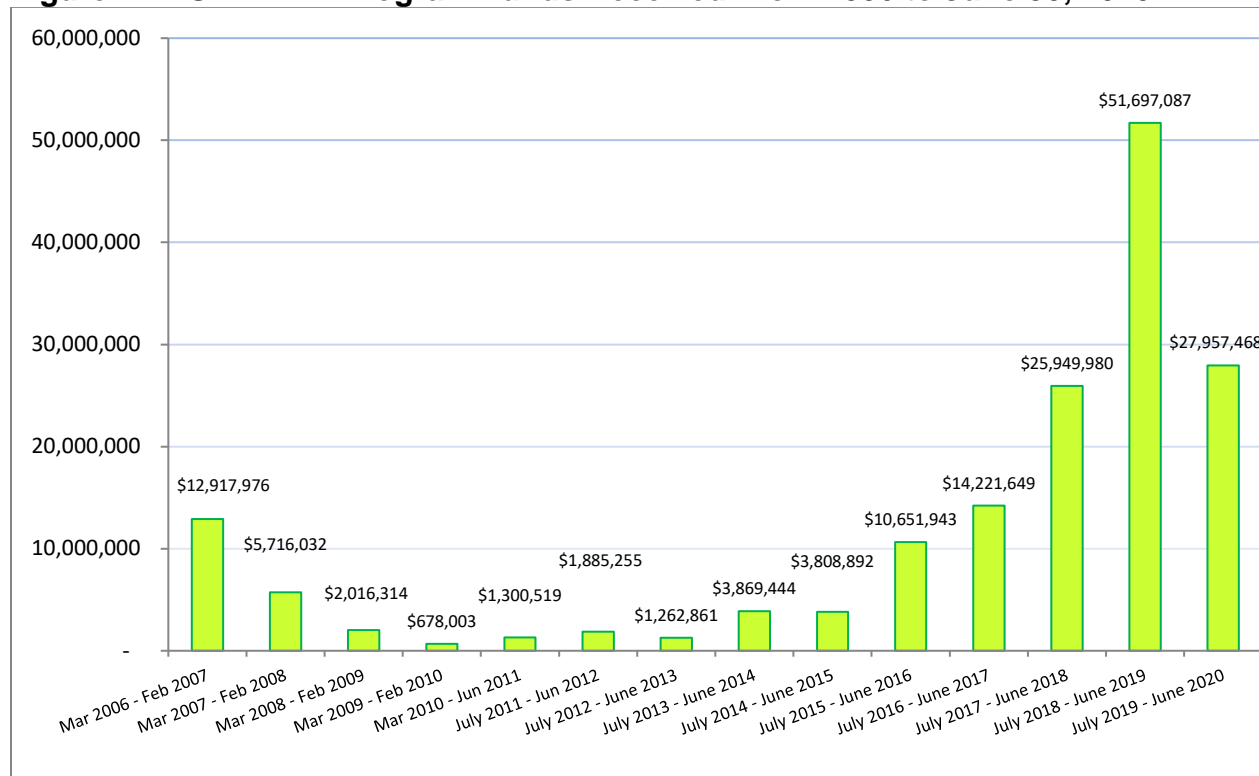

Kern County has prepared a draft Supplemental Recirculated Environmental Impact Report (SREIR) for the revisions to the Ordinance. The revisions are to address the issues pointed out by the Appellate Court. The SREIR was released for a 45-day public review period closing on September 16, 2020.

IV. FISCAL SUMMARY

ISR-VERA Program Funds

As presented in Figure 2 below, the total amount of off-site fees and mitigation funds (Program Funds) received under the ISR-VERA program during this reporting period decreased from \$51,697,087 to \$27,957,468. This noticeable decrease is due to a reduction in mitigation funds provided to the District under the Kern County OGERA as discussed above.

Figure 2: ISR-VERA Program Funds Received From 2006 to June 30, 2020

The District received \$7,423,107 in ISR funds and \$20,534,361 in VERA funds for a combined total of \$27,957,468. The District received \$19,019,208 under the Kern County OGERA, which represented a majority of VERA funds received during the reporting period.

As presented in Table 1 below, the District's ISR-VERA account held a beginning balance of \$66,402,495. During this reporting period, the District received funds totaling \$27,957,468. The District funded off-site emission reduction projects totaling \$20,336,058 during this reporting period, and has encumbered \$21,452,720 in contracts for emission reduction projects in the process of being implemented, leaving an unencumbered balance of \$52,571,184. Since the end of the reporting period for this report, the vast majority of the unencumbered balance has now been encumbered or is in the process of being encumbered for emission reduction projects during this fiscal year.

Table 1: ISR-VERA Fiscal Summary (July 1, 2019 – June 30, 2020)

ISR-VERA Fiscal Summary	ISR	VERA	Total
Beginning Fund Balance	\$11,267,603	\$55,134,891	\$66,402,495
Amount Received	\$7,423,107	\$20,534,361	\$27,957,468
Amount Refunded	\$0	\$0	\$0
Amount Spent	-\$10,115,871	-\$10,220,187	-\$20,336,058
Ending Fund Balance	\$8,574,840	\$65,449,064	\$74,023,904
Encumbered Amount	-\$4,811,839	-\$16,640,881	-\$21,452,720
Ending Unencumbered Amount	\$3,763,001	\$48,808,183	\$52,571,184

V. EMISSION REDUCTION SUMMARY

Achieved Off-Site Emission Reductions

During this reporting period, the District spent ISR and VERA monies to fund 2,727 emission reduction projects affecting 2,728 units. The monies were used to fund new electric vehicles, the replacement of wood stove devices, the replacement of old heavy-duty off-road vehicles, including agricultural tractors, and the replacement of on-road vehicles with newer, cleaner versions.

Emission reduction projects go through a thorough application review before the contract for these projects between the District and the project applicant is executed. Once executed, funds are then encumbered for that project. The contract is valid for a limited time to allow for the purchase of the new equipment and to submit a reimbursement request. Once the reimbursement request is approved, the funds encumbered for the emission reduction project are spent (reimbursed to the project applicant). This process typically takes several months for completion. Therefore, depending on the types of emission reduction projects available for funding, the funds received during this reporting period may result in the funds being spent the in same reporting period or in future reporting periods.

Emission reduction projects achieved total reductions of 1,229 tons NO_x and 632 tons PM₁₀, for a combined total of 1,861 tons at a cost-effectiveness of \$10,927 per ton (Table 2 below). A complete list of all projects funded is presented in Appendix A.

Achieved emission reductions presented in the table below represent only emission reductions from projects that have been completed and paid during this reporting period, and the cost effectiveness is based on those projects.

Table 2: Achieved Off-Site Emission Reductions from ISR-VERA (July 1, 2019 – June 30, 2020)

Achieved Emission Reductions				Amount Spent (\$)	Cost Effectiveness (\$/ton)
Source	NOx	PM ₁₀	Total		
ISR	270 tons	523 tons	793 tons	\$10,115,871	\$12,756/ton
VERA	959 tons	109 tons	1,068 tons	\$10,220,187	\$9,569/ton
Grand Total	1,229 tons	632 tons	1,861 tons	\$20,336,058	\$10,927/ton

Projected Emission Reductions

Projected emission reductions are a combination of emission reductions to be achieved in the future through implementation of project design elements at full project build out and through funding off-site emission reductions projects using off-site emission reduction fees and mitigation fees. For this reporting period, implementation of ISR resulted in projected combined on-site and off-site emission reductions totaling 2,043 tons of NOx and 2,266 tons of PM₁₀ (Table 3 below).

Table 3: Projected Emission Reductions from Approved ISR Projects (July 1, 2019 – June 30, 2020)

Projected Emission Reductions (tons)			
Source	NOx	PM ₁₀	Total
On-site Emission Reductions	581 tons	1,375 tons	1,956 tons
Off-site Emission Reductions	1,462 tons	891 tons	2,353 tons
Total	2,043 tons	2,266 tons	4,309 tons

APPENDIX A - EMISSION REDUCTION PROJECTS

List of all emission reduction projects funded by the ISR-VERA Program

ISR Annual Report / July 2019 - June 2020
