Idling vehicles pump harmful pollution into the air, the same air that school children are breathing as they walk to their parent's vehicle. Please turn off those engines and help protect their developing lungs.

*Los vehículos estacionados con el motor encendido emiten contaminación dañina al aire, el mismo aire que los niños escolares respiran cuando caminan hacia el vehículo de sus padres. Apaga esos motores y ayuda a proteger sus pulmones que aún se están desarrollando.*

### Available Air Quality Tools

You can get air quality information right now! The District's mobile application ([valleyair.org/app](https://valleyair.org/app)) provides accurate real-time air quality information and push notifications to alert you of changing air quality. Using the app, you can also:

- Save up to 10 locations... home, school, mom's work, dad's bike route, dog park, etc.
- Receive alerts during unique air quality episodes.
- Submit confidential air pollution complaints.
- View the daily residential wood-burning status in your area, from November 1 through the end of February.

In addition, many web-based air quality resources have become available that utilize a combination of regulatory-grade air monitors, temporary air monitors, and low-cost sensors to provide real-time information regarding air quality in the San Joaquin Valley including smoke impacts during wildfire episodes (e.g. [airnow.gov](https://airnow.gov))

### Herramientas de calidad del aire disponibles

¡Tú puedes obtener información sobre la calidad del aire ahora mismo! La aplicación móvil del Distrito ([valleyair.org/app](https://valleyair.org/app)) brinda información precisa sobre la calidad del aire en tiempo actual y notificaciones automáticas para alertarte sobre cambios en la calidad del aire. Con la aplicación, también puede:

- Guardar hasta 10 ubicaciones... hogar, escuela, trabajo de mamá, ruta de bicicleta de papá, parque para los perros, etc.
- Recibir alertas durante episodios únicos de calidad del aire.
- Presentar quejas confidenciales sobre la contaminación del aire.
- Ver el estado diario de la quema de leña residencial en tu área, desde el 1 de noviembre hasta finales de febrero.

Además, muchos recursos de calidad del aire basados en la web están disponibles que utilizan una combinación de monitores de aire de grado reglamentario, monitores de aire temporales y sensores de bajo costo para proporcionar información en tiempo actual sobre la calidad del aire en el Valle de San Joaquín incluyendo impactos de humo durante episodios de incendios forestales (por ejemplo, [airnow.gov](https://airnow.gov))
